

## Central Policy Files 1985-1986

The Central Policy Files of the National Academies Archives contain the administrative records of the National Academy of Sciences and its operating arm, the National Research Council, as well as administrative records of the National Academy of Engineering and the National Academy of Medicine. The records in the Central Policy Files encompass operational and program papers documenting the operations and organization of the Academy complex and its study committees. The Academies' activities with international non-governmental scientific unions and organizations are particularly well-represented in the collection.

The documents that make up the Central Policy Files were created and/or received by the institution's Executive Offices in the course of conducting institutional business. The collection therefore only includes institutional, and not personal, papers. The records contained in the Central Policy Files are considered privileged records and are closed to the public for a period of twenty-five years. Records in the Central Policy Files twenty-five years old and older are open to qualified researchers.

The records in the Central Policy Files are organized according to the NAS Records System, the structure of which follows the organization of the institution at the time the records in question were created. Under this system, the placement of an activity within the collection may change over a period of years, corresponding to changes in the organization of the institution. Beginning with the arrangement of records created in 2000, a modified and streamlined version of the NAS Records System has been in place.

For ease of use, the Central Policy Files are divided into discrete date banks, each of which encompasses a given number of years. Outline finding aids to the Central Policy Files correspond to date banks as they exist in the Archives. Because the Academies' activities are so numerous and varied, it is not possible to give capsule descriptions of each. However, the individual entries in the outlines to the collection should provide a general idea of the scope and subject matter of the activities documented.

### ADMINISTRATION

#### COMMITTEES & BOARDS

- Board on Agriculture
  - Committees
    - Agricultural Education in Secondary Schools: 1985-1986
    - Analytic Methods for Estimating Pesticide Benefits: 1985
    - Animal Nutrition: 1985-1986
    - Competency Needs in Agricultural Research Personnel: 1985
    - Managing Global Genetic Resources: 1986
    - National Strategy for Biotechnology in Agriculture: 1985
    - Peer Review Procedures Used by USDA-ARS to Evaluate Proposed In-House Research Projects (US Department of Agriculture-Agricultural Research Service): 1986
    - Role of Alternative Farming in Modern Production Agriculture: 1985

- Scientific & Regulatory Issues Underlying Pesticide Use Patterns & Agricultural Innovation: 1985
    - Technological Options to Improve Nutritional Attributes of Animal Products: 1985-1986
  - Conferences
    - Technology & Agricultural Policy: Joint with Harvard University & RFF (Resources for the Future): 1986
