

Vannevar Bush Papers

1934-1938

This small collection of [Vannevar Bush's](#) papers cover Bush's work with the National Research Council in the mid- to late-1930s. The work of the Committee on the Relation of the Patent System to the Stimulation of New Industries, of which Bush was a member, is documented in substantial depth in fifteen folders, which make up the bulk of the collection. Bush's work as Chairman of the Research Council's Division of Engineering and Industrial Research is also documented here, in addition to his work with the Committee on Scientific Aids to Learning. Additional folders document the Research Council interdivisional relations, as well as a prospective study for the Federal government's Rural Electrification Administration.

The size of the collection is approximately 1 linear foot, spanning the dates of 1958-1976. Provenance: Carnegie Institution of Washington.

FILE LIST

- Committee on Relation of Patent System to Stimulation of New Industries
 - American Association for Advancement of Science (AAAS) Resolution: 1935-1936
 - Correspondence
 - Compton D M: 1934-1936
